about company

Eyota Technology is a professional Web Service company, offering a wide range of services which range from designing and development that is covering almost all the field in the best possible way.

We view clients as partners, and our success is only measured by the success of our partners. So we put it all on the table in order to exceed expectations. We know each new project is a gamble, but there is no one we'd rather bet on than ourselves. At Eyota Technology, our culture matters. And it reflects in our work. Here, jobs are careers, not just a way to pay the bills. The finished product matters to us because it carries our name

areas we focus

We delivers cutting-edge solutions to clients across the globe in the areas of:

- Web Design and Development
- Web Hosting
- Domain Registration
- Multimedia Solution
- Bulk Email and SMS Marketing .

website development

Website development includes web design, web content development, client liaison, client-side/server-side scripting, web server and network security configuration, and e-commerce development.

However, among web professionals, "web development" usually refers to the main non-design aspects of building web sites: writing markup and coding..There are two types of web development Static and dynamic. Static website is cannot update from user side. Dynamic development is update from customer end.

web designing

Web design is a broad term used to encompass the way that content (usually hypertext or hypermedia) is delivered to an end-user through the World Wide Web, using a web browser or other web-enabled software is displayed. The intent of web design is to create a website—a collection of online content including documents and applications that reside on a web server/servers. A website may include text, images, sounds and other content, and may be interactive.

unlimited web hosting

Web hosts are companies that provide space on a server they own or lease for use by their clients as well as providing Internet connectivity, typically in a data center. Web hosts can also provide data center space and connectivity to the Internet for servers they do not own to be located in their data center.

We specialize in Windows, Linux , and Java-based hosting services. We provide cheap domain name registration, dedicated server in an extremely affordable package. Our hosting plans guarantees 100% network uptime and 24/7 customer support. Linux and Windows platform are allocated space in the range of 100GB, 500GB, 1000GB and Unlimited

search engine optimization

Search engine optimization (SEO) is the process of improving the visibility of a website or a web page in search engines via the natural or un-paid (organic or algorithmic) search results. SEO may target different kinds of search, including image search, local search, video search and industry-specific vertical search engines. This gives a website web presence
